

## Press release

January 2017

### Change of management at camos

#### **Steffen Lorscheider takes over from Hans-Jürgen Lehnert**

**Stuttgart, 31 January 2017** – Steffen Lorscheider took over as managing partner of camos Software und Beratung GmbH with effect from 1 January. He is responsible for development and technical product management and has consequently taken over as the successor to founding partner Hans-Jürgen Lehnert. Michael Hüllenkremer – head of sales – and Simon Märkle – head of consulting – are delighted to be working with their new colleague on the management board.

Business informatics graduate Steffen Lorscheider has been with camos since 2000 and played a major role in the development of camos Develop. In 2014 he took over management of the camos Develop development team. 'I've been working at camos for over 15 years now and know the technologies and the market. It is this experience that I'll be drawing on as an executive manager to push ahead with the further development of our products for the digitalised industry', explained Steffen Lorscheider. Michael Hüllenkremer: 'We've found the perfect successor in Steffen Lorscheider. His knowledge and experience are of paramount importance in terms of the development of camos'.

Hans-Jürgen Lehnert founded camos in Stuttgart in 1986 together with Michael Hüllenkremer and two other partners as the first spin-off of the Fraunhofer Institute for Industrial Engineering (IAO). He is now retiring from the company after over 30 years of service.
