

Press Release

January 2019

camos Christmas donation for three social projects

Stuttgart, 10 January, 2019 - Traditionally, camos Software und Beratung GmbH takes the opportunity of the Christmas season to make donations to needy people. Furthermore, in 2018 the company deliberately renounced Christmas gifts and instead donated a total of € 10,000 to three charities. The donations focussed on international emergency medical aid and support for children in need. The following three organisations were funded:

- [Médecins sans Frontières](#) provides emergency medical aid worldwide to people affected by crises, armed conflict and natural disasters. For example, the organisation carries out more than ten million medical procedures annually and supplies more than 81,000 severely malnourished children with food.
- [Friends-4-Friends](#) takes care of children in Namibia in the project "Home of Good Hope". This project also benefited from the camos Christmas donation, which is being used for medical purposes and in part to also purchase glasses, school uniforms, books and pencils.
- [Terre des hommes](#) pursues the goal of creating a "humanitarian Earth". The organisation helps street children and child soldiers, combats child labour and campaigns for children's rights.

camos has continuously made Christmas donations since 2009, with an emphasis on providing sustainable aid by repeatedly selecting internationally recognised organisations as fundraisers.
